

Gypsy Children's Education

River gypsies in Bangladesh are having the various problem. 24000 kilometres of previous waterways has sunk into only 6 kilometres in the country by the dry season. Gypsy children are born and brought up on roaming boats. Traditionally, river gypsies are used to water life. They have inherited from their father the necessary life skills to survive in waters. They have no education and training to adapt to mainstream modern society. So that authority feels the need to bring them under a formal education network. But they have no permanent living place. Some voluntary organizations are running special schools on boats to educate Gypsy children in some areas. In this case, we can increase our helping hand to word them. We can help the gypsy children to learn. At every point where they travel, we can make a camp for their learning. We can also make an organization where some volunteers run special schools on boats.
